

Updates on NSF Geospace Data Infrastructure

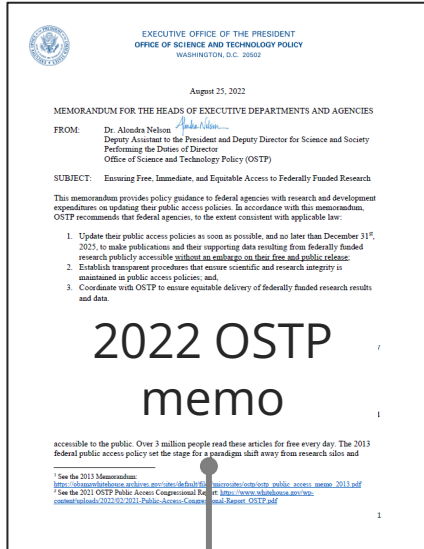

Tai-Yin Huang
Program Director
Geospace, AGS Division
Geosciences Directorate, NSF

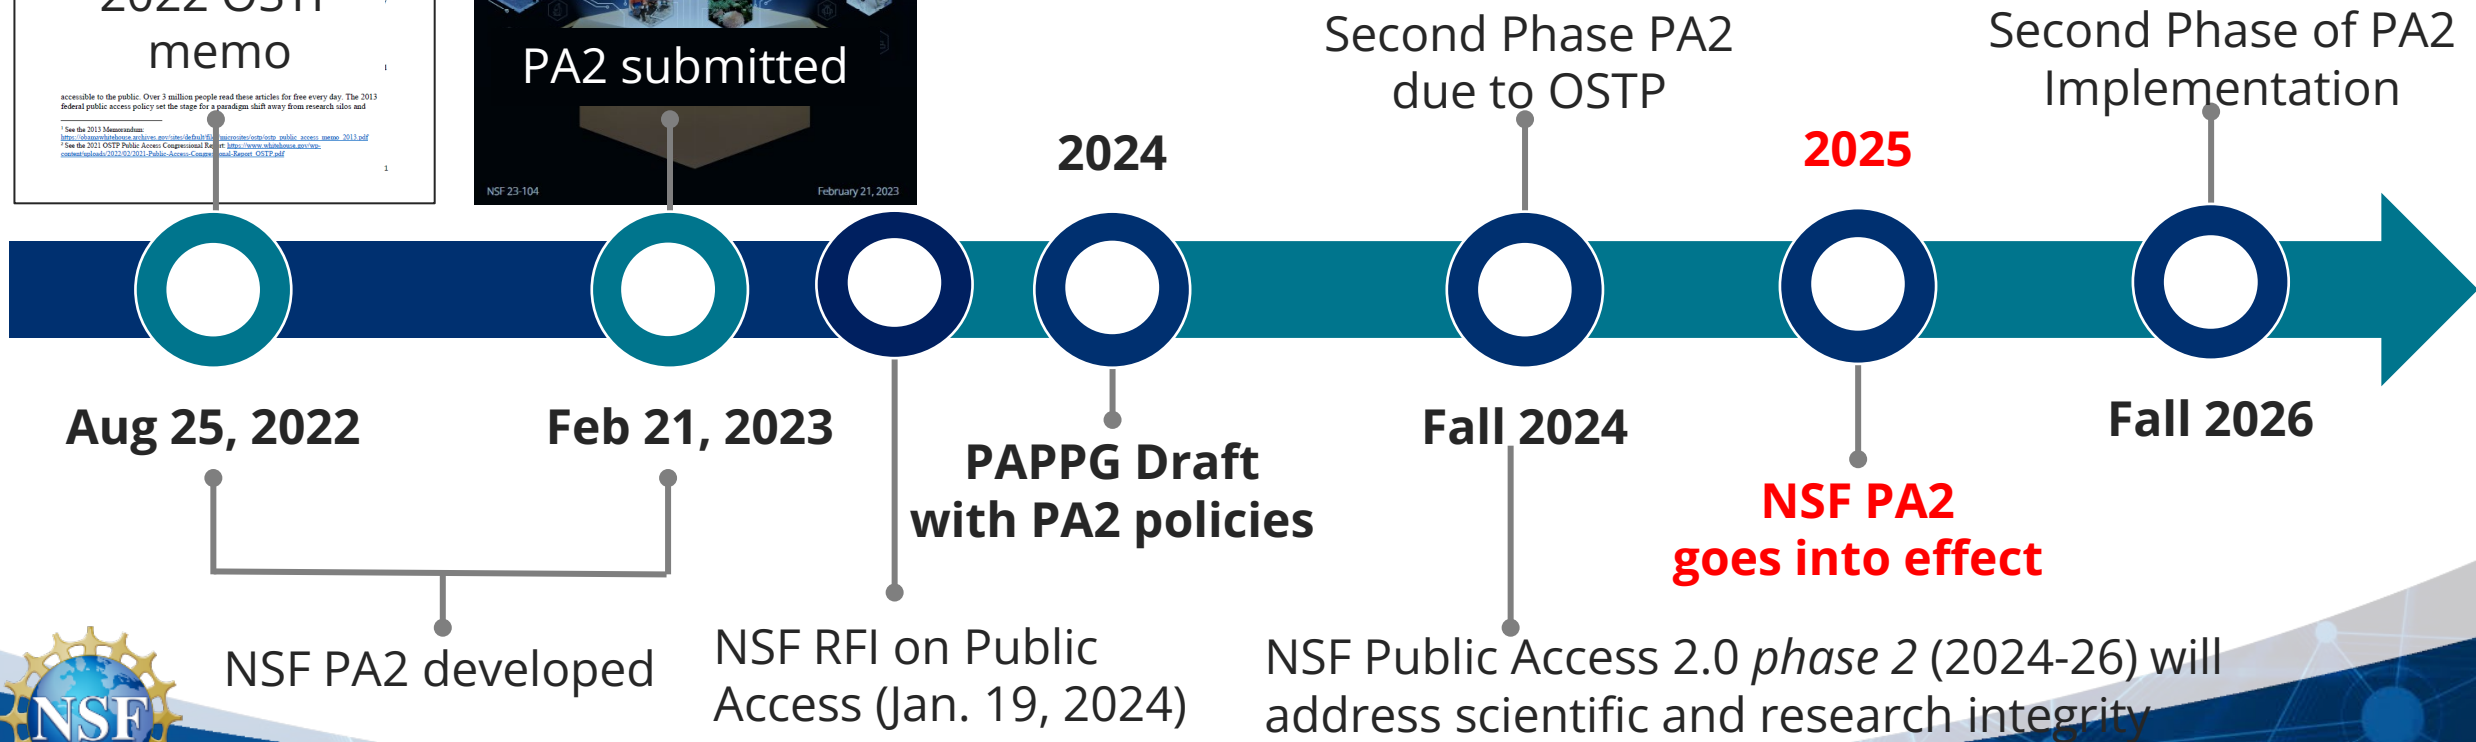

June 11, 2024
CEDAR Workshop

NSF Public Access 2.0 (PA2)

NSF PA2 implements new federal-wide requirement for immediate (upon publication) public access to *articles and underlying data* for federally-funded research*

*** NOTE: there are allowances for potential legal, privacy, ethical, technical, intellectual property, or security limitations**

Unpacking the 2022 memo guidance

CURRENT: NSF15-52

Jan 2025

WHAT

Peer-reviewed publications resulting from NSF funding

Peer-reviewed publication [and conference proceedings](#) resulting from NSF funding
[+ Data undergirding above](#)

HOW

Submission to NSF-PAR via annual reporting (RPPR) by PI

Submission to NSF-PAR via annual reporting (RPPR) by PI

[+ Deposition of data to an external repository and recording DOI in NSF-PAR by PI](#)

AND

Recent NSF-PAR update allows documentation of datasets via digital object identifier (DOI)

Implementation plans for these policy changes in development now

NSF Public Access

Articles deposited in NSF PAR can be in one the forms:

- Version of Record (**VOR**)
- Author's Accepted Manuscript (**AAM**)
- Journal publication.

Geospace Data Infrastructure Activities

- Issued a Dear Colleague Letter: Innovations in Open Science Planning workshops (NSF 23-141)
- Created the Interagency Heliophysics Data Working Group
 - Organized a Cloud Workshop, July 2023
 - Held Listening Sessions July-October, 2023
 - Held agency townhall at TESS, April 2024
- GEO rep and member of the NSF Public Access Open Science Working Group involving in policy changes.
- Provided travel funds to Workshops and a summer school
 - DASH Meeting 2023, October 2023.
 - Python in Heliophysics Summer School, May 20-24, 2024.
 - NSF NCAR Community Expectations for a Geoscience Data Commons, May 29-31, 2024.
 - CCMC Workshop, June 3-7, 2024.

AGS-Supported Data Infrastructure

- **Madrigal Database:** manages and serves archival and real-time data from a wide range of upper atmospheric science instruments.
- **SuperMAG:** provides easy access to validated ground magnetic field perturbations in the same coordinate system, identical time resolution and with a common baseline removal approach.
- **Community Coordinated Modeling Center (with NASA):** provides access to modern space research models; tests and evaluates models; supports Space Weather forecasters; supports space science education.
- **SuperDARN:** provides access to SuperDARN data in platform-independent netCDF files and data visualizer.
- **AMPERE:** provides AMPERE magnetic perturbation data and data products derived from the Iridium constellation

AGS-Supported Data Infrastructure

The US NSF National Center for Atmospheric Research (NSF NCAR)

- **Geoscience Data Exchange (GDEX)**: public data repository.
- **Computational and Information Systems Lab (CISL)**: provides supercomputing, analysis and visualization resources, stores, develops, and curates data sets.
- **High Altitude Observatory (HAO)**: provides data (MLSO and PFI) and models.
- **Climate Data Gateway (CDG)**: provides long-term stewardship for data assets related to geo- and helio-science model output that are generated as a result of NCAR research.

To search and discover datasets across all of NCAR's data repositories, use: <https://data.ucar.edu/>.

To submit a request to deposit data at NCAR, do so through: <https://submit-data.ucar.edu>.

Contact datahelp@ucar.edu or Douglas Schuster schuster@ucar.edu for more information.
Contact Douglas Schuster if interested to be on the ios-geodatacommons listserv.

Open Science Funding Opportunities

- **NSF 23-141:** Dear Colleague Letter: Innovations in Open Science (IOS) Planning Workshops (nsf23141) | NSF - National Science Foundation
- **NSF 23-529:** Research Coordination Networks (RCN)
- **NSF 23-556:** Pathways to Enable Open-Source Ecosystems (POSE)
- **NSF 23-046:** Advancing Research in the Geosciences Using Artificial Intelligence (AI) and Machine Learning (ML)
- **NSF 23-534:** Geosciences Open Science Ecosystem (GEO OSE)
- **NSF 22-632:** Cyberinfrastructure for Sustained Scientific Innovation (CSSI)
- **NSF 24-7414:** Cyberinfrastructure Public Access Open Science (CI PAOS)
- **NSF 24-085:** Dear Colleague Letter: Leveraging Cyberinfrastructure for Research Data Management (RDM)
- **National AI Research Resource Pilot:** [NAIRR Pilot - NAIRR Pilot Resource Requests to Advance AI Research](#)
